

Stripe Price ID Discovery Guide for SafePlay™

Current Problem

Your application is configured with **placeholder price IDs** that don't exist in Stripe:

- price_basic_monthly ❌ (Not a real Stripe ID)
- price_premium_monthly ❌ (Not a real Stripe ID)
- price_family_monthly ❌ (Not a real Stripe ID)
- price_lifetime_onetime ❌ (Not a real Stripe ID)

What We Need

Real Stripe price IDs from your existing products, which look like: `price_1AbCdEf2GhIjKl3M`

Step-by-Step Instructions to Find Real Price IDs

Step 1: Access Your Stripe Dashboard

1. Go to dashboard.stripe.com (<https://dashboard.stripe.com>)
2. Make sure you're in **Test mode** (toggle in top-left if needed)
3. Click on **"Products"** in the left sidebar

Step 2: Find Price IDs for Each Product

For each of your 4 existing products, follow these steps:

For "Basic Plan" (\$9.99 USD per month):

1. Click on **"Basic Plan"** in your Products list
2. In the pricing section, look for the **monthly price**
3. **Copy the Price ID** - it starts with `price_` and has a long string of characters
4. **Write it down:** Basic Monthly Price ID = `price_`

For "Premium Plan" (\$19.99 USD per month):

1. Click on **"Premium Plan"** in your Products list
2. In the pricing section, look for the **monthly price**
3. **Copy the Price ID**
4. **Write it down:** Premium Monthly Price ID = `price_`

For "Family Plan" (\$29.99 USD per month):

1. Click on **"Family Plan"** in your Products list
2. In the pricing section, look for the **monthly price**
3. **Copy the Price ID**
4. **Write it down:** Family Monthly Price ID = `price_`

For “Lifetime Plan” (\$599.99 USD):

1. Click on “**Lifetime Plan**” in your Products list
2. In the pricing section, look for the **one-time price**
3. **Copy the Price ID**
4. **Write it down:** Lifetime Price ID = price_____

Template for You to Fill Out

Please provide the real price IDs by filling out this template:

REAL STRIPE PRICE IDs FROM MY DASHBOARD:

Basic Plan Monthly Price ID: price_____
 Premium Plan Monthly Price ID: price_____
 Family Plan Monthly Price ID: price_____
 Lifetime Plan Price ID: price_____

What Happens Next

Once you provide the real price IDs:

1.  **Update Application Configuration** - We'll replace the placeholder IDs with your real ones
2.  **Fix Subscription Creation** - No more “No such price” errors
3.  **Test Complete Flow** - Verify signup and payment work end-to-end
4.  **Deploy Working Version** - Get your application fully functional

Alternative: Create New Pricing Structure

If you prefer to implement your desired new pricing structure instead:

Sam's Desired Structure:

-  **Free Plan** (no payment required)
-  **Starter Plan:** \$9.99/mo | \$100/yr
-  **Professional Plan:** \$19.99/mo | \$200/yr
-  **Enterprise Plan:** \$29.99/mo | \$300/yr

We can create these new products in Stripe and configure the application accordingly.

Quick Test Option

If you want to test immediately with existing products:

1. Provide just the **Basic Plan monthly price ID** first
2. We'll update the application to use that one price ID

3. Test the subscription flow works
4. Then add the remaining price IDs

Please reply with the real price IDs from your Stripe dashboard so we can fix the application!
